Examiner's Statement of Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance: as Applicants pointed out in the Remarks, the prior art of record (Karkare, Gove, and Charisius) do not disclose and/or fairly suggest at least claimed limitations recited in such manners in independent claim 1 "*...defining a policy specifying an operational concern to be monitored in the IDE runtime environment through a policy manager of the IDE user interface; determining an application component of an application to be monitored in the IDE based on the policy, the application comprising operational logic and business logic, the application component being selected from the operational logic of the application and having associated information in a component repository of the IDE runtime environment, wherein the component repository is configured to provide a list of components that are available to be invoked by the IDE runtime environment; monitoring the application component with a policy agent executing in the IDE runtime environment and enforcing the policy specifying the operational concern to determine a plurality of metrics associated with the application component...*" and similarly recited in such manners in other independent claims 9 and 10 (Remarks, pp. 8-14).

These claimed limitations are not present in the prior art of record and would not have been obvious, thus all pending claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
